Eneeka Bryan
2020 Graduate

I still have that ear-to-ear smile having been revered as a stand-out teacher, at the Old Harbour High School. My performance is a direct result of the stellar education and training provided by the team at the University of Technology, Jamaica (UTECH). In 2020 I completed my teaching practice and my stellar performance paved the way for employment for a period of eight months. This experience was wonderful! I am a proud fruit of the Family and Consumer Studies Programme. My training as a twenty-first century teacher prepared me for online teaching and learning during the COVID-19 pandemic. In my programme I was exposed to online platforms that made the transition a breeze. My journey in this programme provided the best educational and life-changing experience.

Alex Johnson
Dietetics & Nutrition

Throughout my time at the University of Technology, Jamaica I had three courses with the Food Service Production & Management (FSP&M) unit. I can truly say those courses were some of the most impactful ones. The lecturers carried a motherly persona and were very caring, well trained and informed. They delivered the modules with relevance to our areas and that made my course of study, as a medical-based student, more relevant and meaningful.

Entry Requirements

Possess the following or equivalent qualifications:

Five (5) CSEC passes including Mathematics, English Language (grades 1,2 &3*) and three (3) other approved subjects.

Applicant may be eligible for advanced standing and/or credit transfer/exemption.

Prior Learning Assessment (PLA)

Prepared and updated 2024

Shericka Pink
2022 Graduate

The first two years of my university life were normal face-to-face interaction. In March 2020, the COVID-19 pandemic hit, and the university made an immediate switch to remote learning. However, my lecturers were caring, accommodating and patient with us throughout the transition process. If you are interested in a career related to Food & Nutrition or Family & Consumer Studies, I implore you to apply here. This programme not only prepares you to be a teacher but also an entrepreneur or to work in the hotel industry.

Sushan Robinson
2023 Graduate

I thought university life was never meant for me.

The FSP&M programme changed my mindset in many good ways. I was exposed to phenomenal lecturers who encouraged and motivated me when I felt like leaving or giving up. Other times, I cried because I felt overwhelmed by the many assignments. But then.....victory, when my Grade Point Average (GPA) proved that the hard work I invested was never in vain.

Abigail Morris
4th Year

Adjusting to online school was a brand new experience. I made great memories with great people who supported and helped each other. I had fun during my first semester doing labs. This was my time to express my creative side, interact with my classmates and welcoming lecturers and move away from the computer screen. My lecturers not only teach: They also guide us on the right path and motivate us.
